Ideal for home gardens, require little space but produce full size fruit second or third year after planting. Enjoy delicious home

grown fruit from your own dwarf trees.

WINTER APPLES

* **REDWELL**—"Winter Wealthy" although it is quite superior to it in many ways. It hangs to the tree until a bright red. Good eating when picked or in February and March.

BEACON RED APPLE

The best red apple for eating. Early ripening. We furnished a N.Y. Orchard 500 trees so they must be good.

CANNAS

Cannas make the best showing when planted in beds
by themselves. The soil should be well fertilized and
worked up thoroughly to a depth of 10 to 12 inches. The
bulbs can be set about 12 inches apart and about 4 to 6
inches deep. Mulchings with lawn cuttings will help re-
tain the moisture. Start bulbs in pots indoors in March
or April. Do not set out until all danger of frost is over;
about June 1st here in the Northwest.

City of Portland. Large blooms in good-sized clusters, medium
rose-pink, strong stems well above the green foliage. One
of the best pinks.

The President. 4 ft. tall. Glowing scarlet, blue-green foliage.
Extra large trusses of brilliant color. The finest Red Canna
of today. The foliage is entirely free from disease.

Yellow King Humbert. 5 ft. tall. Deep rich yellow, heavily
spotted and flecked with deep red. Green foliage.

Red King Humbert. 5 ft. tall. The grandest Canna ever offer-
ed, a king in reality. The heart-shaped leaves are purple-mad-
der over-bronze. The plants are crowned with immense heads
of orchid-like velvety orange-scarlet, rose-tinted and blossoms
incomparably beautiful.
